SUMMARY

CEH-certified Penetration Tester with hands-on experience in web, network, API, and mobile security. Built and secured a full-stack password vault using AES-256 encryption, mitigating SQLi, XSS, and CSRF vulnerabilities. Proficient in Burp Suite, Nmap, Metasploit, Wireshark, and OWASP methodologies, with strong Linux fundamentals. Active in CTF platforms (HackTheBox, TryHackMe), delivering reproducible PoCs and clear remediation strategies.

EDUCATION

Yashwantrao Chavan Maharashtra Open University, Mumbai

July 2025

Bachelors in Computer Application

Relevant Coursework: Computer Networks, Python, Cryptography, and System Security

SKILLS

- **Penetration Testing**: Web, Network, API, Mobile
- **Tools**: Burp Suite, Nmap, Metasploit, Wireshark, Postman
- **Frameworks**: OWASP Top 10, MITRE ATT&CK
- **Techniques**: Enumeration, Exploitation, PoC Development, Persistence, Privilege Escalation
- **Systems**: Linux (Kali Linux), Windows

PROJECTS

DVLLM Lab (Deliberately Vulnerable LLM)

March 2026

- Built a vulnerable LLM-integrated web application using Flask and SQLite to simulate real-world security flaws.
- Implemented exploits including prompt injection, data poisoning, SSRF, XSS, SQL injection, and access control bypass, with DVWA-style security levels for attack and mitigation comparison.
- Demonstrated end-to-end attack chains (SQLi → admin access → SSRF → data exposure) and applied secure coding practices in higher security configurations.

Secure Web-Based Password Vault

March 2025

Undergraduate project

- Developed a full-stack password management application with AES-256 encryption and secure authentication mechanisms.
- Implemented features like weak password detection and darknet monitoring while identifying and mitigating vulnerabilities such as SQL Injection, XSS, and CSRF.
- Designed a responsive UI and ensured data integrity, usability, and scalable architecture with cloud deployment.
